Healsio dapat memasak secara otomatis.

MEMASAK SEMUA DALAM SATU FUNGSI

Meskipun jumlah bahan makanan yang dimasak banyak, baik beku, dingin atau bersuhu ruang. Makanan dengan suhu berbeda dapat diletakkan di baki yang sama dan Anda tidak perlu repot. Hanya perlu memilih fungsi "grill" "bake" "stir-fry" dan "steam". Healsio dapat memasak secara otomatis dan bisa ditinggal selama proses memasak.

Grill & tanpa digoreng | Minim minyak & lebih sehat !

Bake | Tidak perlu khawatir masakan gosong.

Tanpa digoreng

Stir Fry | Memasak seperti menumis di wajan

Ayam tumis dengan kacang Mete.

Salmon panggang dengan sayur.

Steam & Boil | Mengukus beberapa makanan sekaligus.

Telur kukus, udang dan asparagus.

Rahasia memasak secara otomatis adalah superheated steam dan sensor suhu

Steam oven biasa, hanya mengubah air menjadi uap, tapi Healsio mengisi oven dengan superheated steam di awal proses. Injeksi superheated steam tembus sampai ke dalam bahan makanan. Superheated steam dapat menyalurkan panas ke suhu yang lebih rendah. Sehingga dapat memasak makanan bersuhu dingin dan bersuhu ruangan sekaligus. Kombinasi sensor suhu dan superheated steam dapat memasak dan memonitor bahan makanan secara bersamaan.

Dengan superheated steam, semakin rendah suhu makanan yang dimasak, semakin rata panas yang disalurkan.

Sensor suhu mampu mengatur waktu pemanasan berdasarkan jumlah bahan yang dimasak.

*1 Hasil masakan bergantung dari tipe dan bentuk makanan.

Total berat bahan makanan kurang lebih 1 kg.

*2 Pemilihan bahan makanan beku atau tidak, diperlukan.
