Audio & Active Speaker Innovation

1. Sound Balance

SHARP

Perpaduan antara suara Bass, gitar, dan suara vokal lebih harmonis. User bisa menikmati musik dengan lebih detail.

Others

Perpaduan antara suara Bass, gitar, dan suara vokal tidak seimbang. Cenderung over bass, sementara suara instrumen lain seperti gitar, piano, vokal tidak terlalu "terbuka" jika dibandingkan dengan bass.

*Test speaker Sharp dan kompetitor tidak hanya di level vol maksimal, tetapi di level menengah. Sharp Speaker suara masih balance dan kompetitor biasanya Bass dominan dan tidak seimbang.

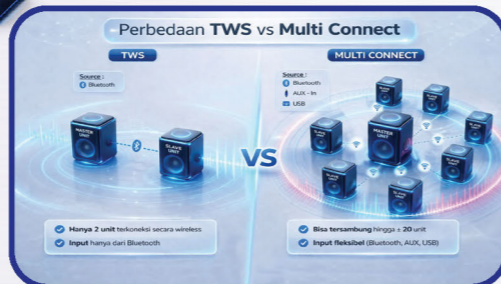

2. Multi Connect

EXCLUSIVE FEATURE
1st Scalable Audio System in Indonesia

Menghubungkan hingga 20 speaker secara nirkabel untuk menciptakan pengalaman audio yang lebih luas dan powerful.

Seluruh speaker memutar audio yang sama secara sinkron (mono), menghasilkan distribusi suara yang merata tanpa terputus.

3. True Wireless Stereo (TWS)

Menghubungkan 2 unit dengan model yang sama secara nirkabel hanya dengan satu sentuhan tombol untuk menggandakan kekuatan Speaker.

Bersama-sama, speaker berbagi sumber audio Bluetooth yang sama dan beroperasi sebagai saluran kiri dan kanan (True Wireless Stereo).

4. High Quality Box Material

SHARP

OTHERS

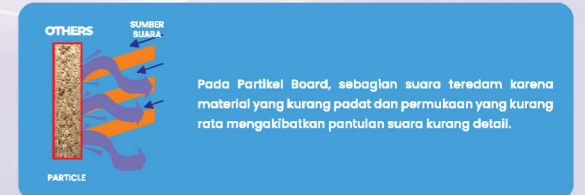

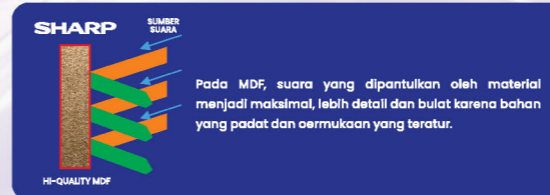

MDF

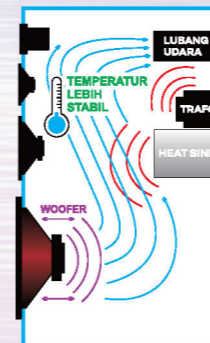

1. Bahan berkualitas tinggi, lebih awet dan tahan lama.
2. Lebih Padat, pantulan suara lebih sempurna dan lebih detail.
3. Lebih rapi dan bagus secara desain karena dikerjakan dengan mesin proses MDF berteknologi tinggi.

PARTIKEL

1. Kualitas lebih rendah dan mudah rusak.
2. Pantulan suara tidak sempurna karena sebagian suara teredam dengan kepadatan material yang kurang baik.
3. Bentuk umumnya kotak, biasanya mempergunakan plastik untuk pembentuk desain.

5. Cool Air Flow System

Sirkulasi udara akibat woofer yang bergetar akan dialirkan melewati bagian-bagian/ parts elektronik seperti trafo dan modul.

Efeknya adalah udara tersebut menjadi pendingin alami dari parts elektronik tersebut.

Suhu unit speaker menjadi terjaga, sehingga bisa lebih lama ketika dinyalakan serta lebih awet dan tahan lama.
